

- ⊕ Well Locations
- Zone I
- ▨ Groundwater Protection Overlay District (Zone II)

**Zone I:** The protective radius around a public water supply well or well field that must be owned by the water supplier, or controlled through recorded conservation restriction. In most cases, it is a four hundred (400) foot radius around the well (less for wells pumping less than one hundred thousand (100,000) gallons per day (gpd)).

**Zone II:** The delineated recharge area to a public drinking water well as approved by MassDEP and defined under the Massachusetts Drinking Water Regulations 310 CMR 22.00. The area of an aquifer which contributes water to a well under the most severe pumping and recharge conditions that can be realistically anticipated (180 days of pumping at safe yield with no recharge from precipitation), as defined by 310 CMR 22.00 and as approved by the Massachusetts Department of Environmental Protection (DEP).
